## SUMMARY

Software Engineer specializing in backend development. Proficient in multiple languages, with primary expertise in C# and SQL. Experienced in maintaining and improving large-scale web and desktop applications used by thousands daily. I am skilled in building new projects from scratch, maintaining legacy codebases, migrating systems to modern technologies, and implementing new software architectures to improve scalability and maintainability.

## SKILLS

- |                       |   |
